

General grounds maintenance.

With 11 acres to keep an eye on, nature often has the upper hand. Part of the beauty of Serenity though is the relaxed and natural surroundings.

We will cut the grass probably once each week outside the house and in the orchard and every two weeks elsewhere.

Later in the year we try to let the wild flowers set seed so they will appear again next year and so we might delay the cut next to the house by an extra week.

I hope you will be back to appreciate the springtime show. If you see any area that needs some attention do mention it and we'll try to give it some care.
